# Building Skills, Month By Month

FEBRUARY FOCUSED ON PEOPLE, PROGRESS, AND PRACTICAL AI LEARNING.

## KEY HIGHLIGHTS - FEBRUARY 2026

### 1. Capability Accelerator Program | Chandigarh University

Managerial and behavioral training for CU Team.

#### Focus areas:

- Clear communication
- People management
- Ownership and confidence
- Professional conduct

Institutions grow stronger when every contributor keeps learning.

## 2. National Recognition for Career-Focused Innovation

### Startup Punjab (GoP) Conclave – Lovely Professional University

TalentGro Global was recognized by **the Department of Industries and Commerce, Government of Punjab** as a scalable, tech-enabled career growth platform.

#### Our work highlighted:

- Solving students real challenges
- Supporting parents with clarity
- Enabling academicians through structured skill models

The focus remained clear — **outcomes, clarity, and future-ready skills.**

## 3. AI Tools & Automation Workshop | Lovely Professional University

### Hands-on workshop organised by the Student Welfare Wing at LPU.

Learners from Physical Education and Media & Journalism explored how AI fits into real academic and professional work.

## Focus areas:

- Prompt frameworks
- AI tools for productivity
- Real-world applications
- Using AI for ATS and academic support

Learning by doing helped students build early confidence with AI.

**Dr. Sorabh Lakhanpal | Dr. Nadim Akhter | Dr. Sunaina Ahuja | Dr. Amit Jain | Dr. Gaurav Karan**

## 4. Advancing AI Conversations with Responsibility

### AI Impact Summit – Pre-Summit Event

In collaboration with **Lovely Professional University, TalentGro Global** contributed to discussions on **AI for Social Good**.

### Followed by:

- Faculty and student workshop
- Responsible AI thinking
- Real-world applications

This aligns with **SDG Goal 4 – Quality Education** and India's growing digital leadership.

## 5. From Awareness to Execution: AI in Practice

### Launch of Cohort 2 – AI Tools & Business Automation

**TalentGro Global** announced the second cohort of its hands-on AI programme.

#### Programme highlights:

- Real AI automations
- Personal AI agents and bots
- Time-saving systems for professionals
- Industry-led learning environment

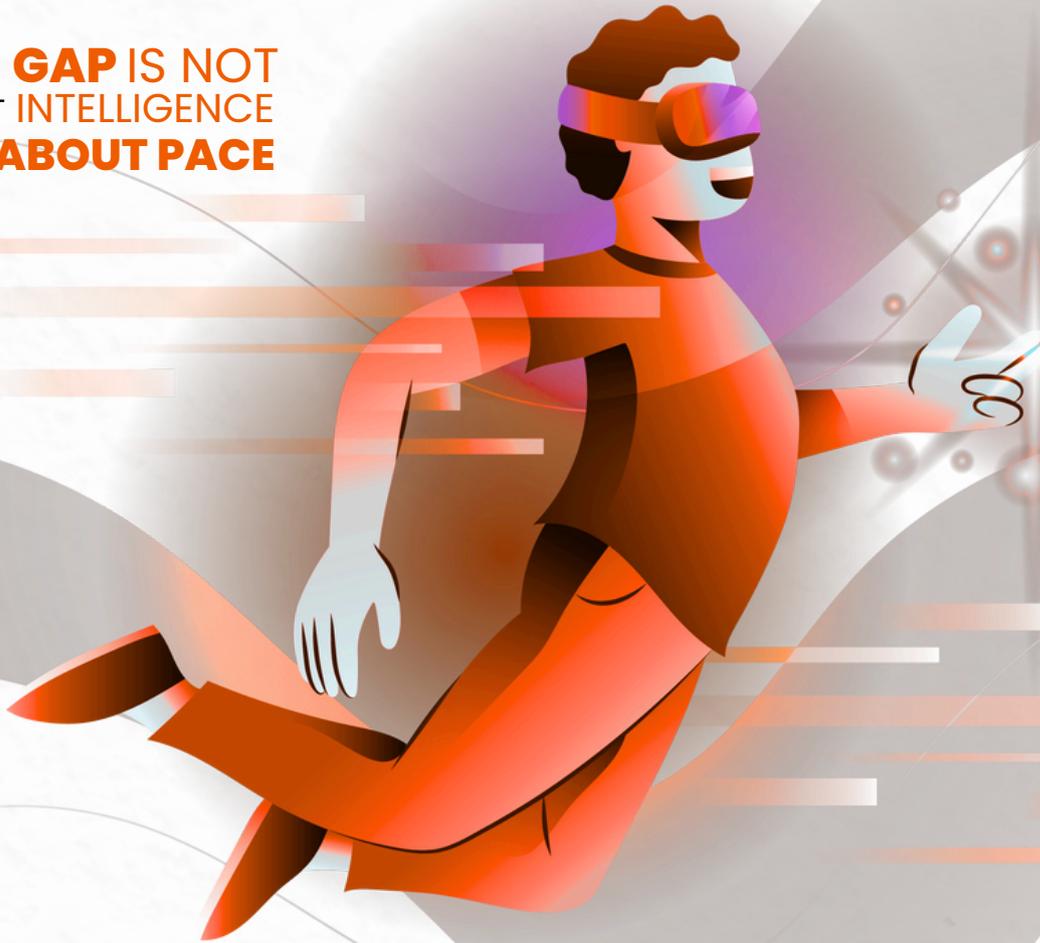

This marks a shift from learning about AI to **using AI with confidence and consistency**.

#### What connects all these moments?

- AI was introduced not as complexity, but as a tool — Cohort 2 builds on the foundation of Cohort 1, helping participants move from understanding AI to using it in everyday work. The focus is on practical tools, simple automations, and consistent application, with **AI positioned as a support to human judgement rather than a replacement**.

# AI Is Moving Fast. ARE WE LEARNING STEADILY?

THIS **GAP** IS NOT  
ABOUT INTELLIGENCE  
IT IS **ABOUT PACE**

- AI is moving fast.
- Human learning takes time.

AI is no longer a distant idea.

**It is already shaping**

how we study

**work &**  
make decisions.

## Don't Wait for the **RIGHT TIME**

New tools appear every week. Automation is becoming common. Yet, many learners feel unsure about where to begin.

# The Comfort Zone Question?

WHEN TECHNOLOGY CHANGES QUICKLY — **COMFORT ZONE** BECOME TEMPTING

IT **FEELS EASIER** TO WATCH FROM THE SIDE. TO WAIT UNTIL THINGS FEEL CLEAR. TO DELAY LEARNING UNTIL **CONFIDENCE** APPEARS.

**ADAPT FASTER  
THAN THE  
WORLD  
CHANGES**

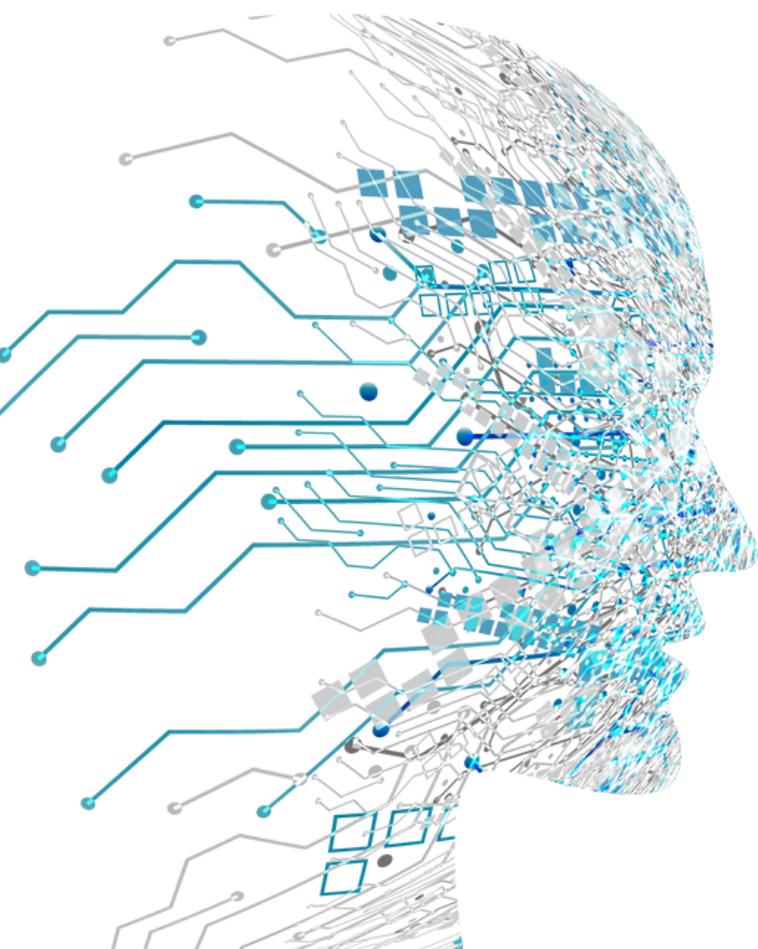

Across campuses and classrooms this month, we saw something encouraging. Students, educators, and professionals choosing to try.

“

But **real growth** rarely starts with **clarity**. It starts with **showing up**, **even** when the path **feels unfamiliar.**

# WHY? CONSISTENCY MATTERS MORE THAN SPEED

At **TalentGro Global**, we believe **learning** works best when it stays practical and grounded.

**AI** rewards those who experiment, practice, and refine. Not those who rush without understanding.

Learning steadily allows people to:

- Ask better questions
- Apply tools with purpose
- Combine technology with human judgement

Resilience grows when learning becomes a habit, not a reaction. This is where progress becomes sustainable.

## From Awareness to “APPLICATION”

Knowing about AI is not enough anymore. What matters is using it meaningfully.

**That shift**—from awareness to application—requires:

- Hands-on practice
- Guided learning
- Time to build confidence

# AI TOOLS & CAREER

COHOROT-2

Business Automation

Starting this **22 February** at **ISB AIC Mohali**.

The programme is designed for learners who want to:

- Understand AI indications through real use
- Build systems that save time at work
- Learn step by step, without feeling overwhelmed

**Not to race ahead.  
But to learn steadily—and apply wisely.**

**The question is how consistently we choose to begin.?**

At **TalentGro Global**, we remain focused on helping learners build skills that last—one step at a time.

**AI WILL CONTINUE TO  
MOVE FAST—THE  
QUESTION IS  
WHETHER TO LEARN IT.**

# AI Tools & Business Automation

Date: **22 Feb, 2026**

Venue: **ISB Mohali**

**8 Weeks**

Hybrid Program

Create **content, videos,**  
and **workflows** in mins.

Master **AI** tools,  
Build **AI Agents & Work**

**5x faster**

- **6 Hours Offline**
- **24 Hours Live on Zoom**  
(3 Hours on Weekends for 8 Weeks)
